

PRODUCT *PRO-FILE*

Endox

A FREE FLOWING ANTIOXIDANT USED IN ANIMAL FEEDS AND PREMIXES

Registration No.: 981048

Net Weight: 25kg

Ingredients:

Calcium Silicate, Corn Cob Fractions, Citric Acid, Phosphoric Acid, Vegetable Oil, Ethoxyquin, Butylated Hydroxytoluene, Disodium EDTA, Butylated Hydroxyanisole, Mono and Diglycerides

Compatibility:

Compatible with all the typical ingredients in the finished feeds and vitamin premixes

Mixing Directions:

Mix Endox to achieve a level of 125 grams per tonne of complete feed.

Color:

Light brown

pH:

2.2-3.0

Moisture:

6 % Maximum

Odor:

Slightly pungent

Residue:

Less than 5 % (20 mesh screen)

Stability:

Very stable

Bulk Density:

Approximate 43 lb per cubic feet (free fall)

Storage:

Store in cool, dry place. Keep containers closed.

Endox is recommended for using to increase stability of vitamins and microelements in feed and feed ingredients. Endox effectively protects the vitamins (particularly Vitamin A) from autoxidation, which can decrease the value of vitamins and microelement feed ingredients.
